

Benjamin Novofastovsky

Livingston, NJ | (973) 818-9016 | bnovofastovs@binghamton.edu | <https://www.linkedin.com/in/benjamin-novofastovsky>

EDUCATION

Binghamton University, State University of New York, Thomas J. Watson College of Engineering and Applied Science

Bachelor of Science in Mechanical Engineering

Expected May 2028

TECHNICAL SKILLS

Software: Fusion 360, ANSYS Workbench, SOLIDWORKS, MS Excel, Solid Works

Programming Languages: MATLAB, C++, Java Script

PROFESSIONAL EXPERIENCE

Veloce Planes, Experimental Aircraft Construction Intern | Whiteville, NC

June 2024 – August 2024

- Assisted in the design and installation of a modified engine by implementation of a turbo.
- Manufactured and assembled airplane parts utilizing composite materials, including fiberglass and carbon fiber.
- Operated, maintained, and repaired foam CNC equipment to ensure precision manufacturing and minimal downtime.

Rav Meidmad 3D Printing, 3D Printer Construction and Modification Intern | Beit Shemesh, Israel *June 2022 – August 2022*

- Constructed and assembled custom 3D printers, including the VORON Zero, VORON Switchwire, and VORON Trident.
- Created custom 3D printers designed to print rubber fabric for use in clothing applications.
- Diagnosed, repaired, and calibrated 3D printers to optimize mechanical reliability and printing precision.

PROJECT EXPERIENCE

Formula Society of Automotive Engineers (FSAE), Suspension Team Member

October 2024 – Now

- Designed and developed the steering system for the Formula SAE car, focusing on precision handling and driver feedback.
- Collaborated with the suspension team to optimize geometry, performance, and packaging through CAD and simulations.
- Utilize ANSYS for structural analysis, Fusion 360 for design modeling, and MATLAB for system optimization.

Binghamton Unmanned Aerial Vehicle (BUAV), Mechatronics Team Member

February 2025 – Now

- Design and development of a payload delivery system for an UAV, ensuring reliability and weight efficiency.
- Utilized Fusion 360 to model and refine mechanical components for payload deployment mechanisms.
- Applied MATLAB for data analysis and system optimization to enhance delivery precision and parachute deployment.

Arduino Competition- Text Adventure, Team Member

October 2024 – December 2024

- Digitally designed and constructed custom wiring for competition.
- Created a custom interactive tower to complement and integrate with a story-based game.
- Presented project to industry professionals/peers and won an award for best presentation at the Watson Arduino Exposition.

LEADERSHIP EXPERIENCE

Binghamton Video Game Association (BVGA), Fortnite Coordinator

August 2024– Present

- Designed practice schedules and coordinated communication between team members.
- Created training programs for players to promote individual growth and team improvement.
- Lead and manage two semifinal-qualifying teams, averaging 54 and 57 points per week respectively.

Binghamton University Simulation and Interface Mechanics Team (BUSIM), President

November 2025– Present

- Leading the business and engineering sides of the club with over 20 members.
- Serve as the primary representative of the organization, communicating initiatives and priorities.
- Lead and coordinate the Executive Board, organizing agendas, chairing meetings, and designating responsibilities.

Civil Air Patrol Airforce Auxiliary (CAP), 2nd Lt and Ex Commander

December 2019 – Present

- Supervised the full cadet staff of the Curtiss-Wright Composite Squadron, overseeing training, and operations..
- Planned instructional meetings focused on developing leadership abilities and team structure
- Lead a squadron of 45+ cadets, coordinating leadership development, training, and operational readiness.

WORK EXPERIENCE

YMCA, Lifeguard and Swim Instructor | Livingston, NJ

October 2022 – Now
